

## MYANMAR ENGINEERING SOCIETY (CAFEO 34 Palawan, Philippines)

Myanmar Engineering Society [MES] was originally formed in 1916 as “The Burma Engineering Congress”. In 1927, the name was changed to “The Association of Engineers in Burms”. Due to the outbreak of World War II, its activities cooled down during the period 1939-1945.

“The Association of Engineers in Burma” resumed its regular activities in 1946 and steadily picked up momentum. However, due to a Government Act abolishing all parties and associations, “The Association of Engineers in Burma”, like all other associations, was abolished in 1963.]

In order to be able to serve its Mother Land in much needed infrastructures for development, economy and urbanization, “The Association of Engineers in Burma” was restructured in 1995 giving birth to “Myanmar Engineering Society”

Actually, Myanmar Engineering Society [MES] was officially formed on 23th Dec, 1995 in the Assembly Hall of YIT with unanimous approval of some 800 engineers and architects present on the occasion.

MES was formally inaugurated on the lawns of YIT on 7th Feb, 1996 with the unveiling of the MES signboard and the delivering of the inauguration speech by the dignitaries of the Government. Prof. Kyin Soe, the Rector of YIT, and Nyi Hla Nge, the Pro. Rector of YIT, were the first President and the first General Secretary of MES.

### Resources

- Library
  - 9071 Books, 3253 Journals, 347 CD
  - Printing & Copying Facilities
- Book Center
  - 3300 Books, 1100 Journals, 700 CD
  - Printing & Copying Facilities

### Member Status

· Fellow	109
· Life	62
· Member	6369
· Associate	3677
· Junior	19045
· Affiliate	1896
· Student	<u>20130</u>
· Total	51179

### Member Status

- Corporate Member Company (CMC) 117
- Chapter 12
  - Mandalay, Taunggyi, Pyay, Nay Pyi Taw
  - Monywa, Maulamyine, Magwe, Tachilake,
  - Patheingyi, Lashio, Sittwe, Kyaing Tong

### Professional Development

- Technical Division (TD) 31
- Interdisciplinary Committee 42
- Coordinating Committee (U Win Khaing)
- 6 TD Groups
