

Work Group on Environmental Engineering

Objectives of the Committee

To provide assistance and advice to AFEO Board and its member organisations on environmental and sustainability matters.

- To identify environmental project and proposal, with particular focus on countries and regions with significant environmental concerns
- To propose new environmental initiatives and identify the resources need for their implementation.
- To assist ASEAN member states on strengthening environmental information and observation capacity, including providing expertise and knowledge in environmental monitoring and assessment.
- To collect, compile and share environmental information and relevant data among AFEO member organisations.
- To identify opportunities for collaborations or partnership amongst ASEAN Member organisations or between AFEO and multi-national engineering companies or public sector to projects which could improve environment monitoring and assessment, knowledge and information on environment of ASEAN member organisations
