Country Report

Young Member of EIT (YMEIT)

**34rd Conference of ASEAN Federation of Engineering
Organisations, Palawan, Phillipines**

November 2016

Roles of Young Engineers

Engineering contribution to our societies are needed to reinforce relationship between people and the young!

Implant the young how to apply the Engineering to Social Responsibility issues

YMEIT's Mission

“Young engineers for a sustainable global society”

“From our past experiences, we believe that the key success in dealing with our sustainable global society strongly relies on **cooperation between young and experienced engineers**, specialists and government sectors. With all the supports, our commitment to engineering will instill a strong sense of pride, honor and integrity.”

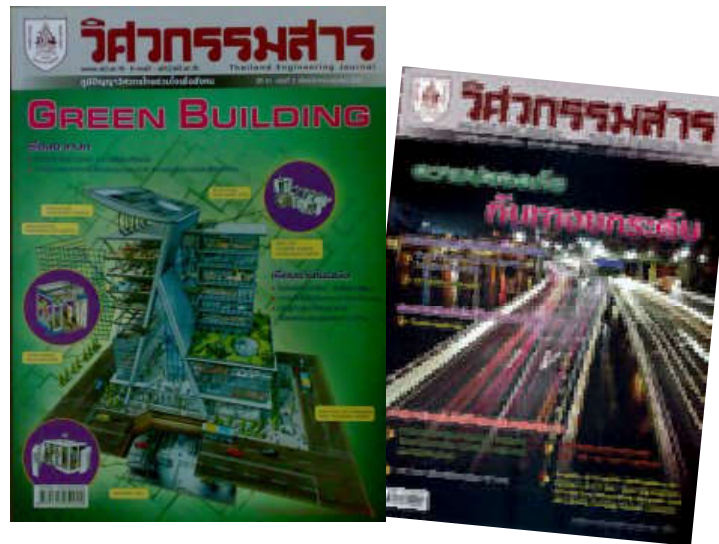

1) 1st Step to Become an Engineer

- To educate and prepare undergraduates in universities all over Thailand to become a full-fledged engineer

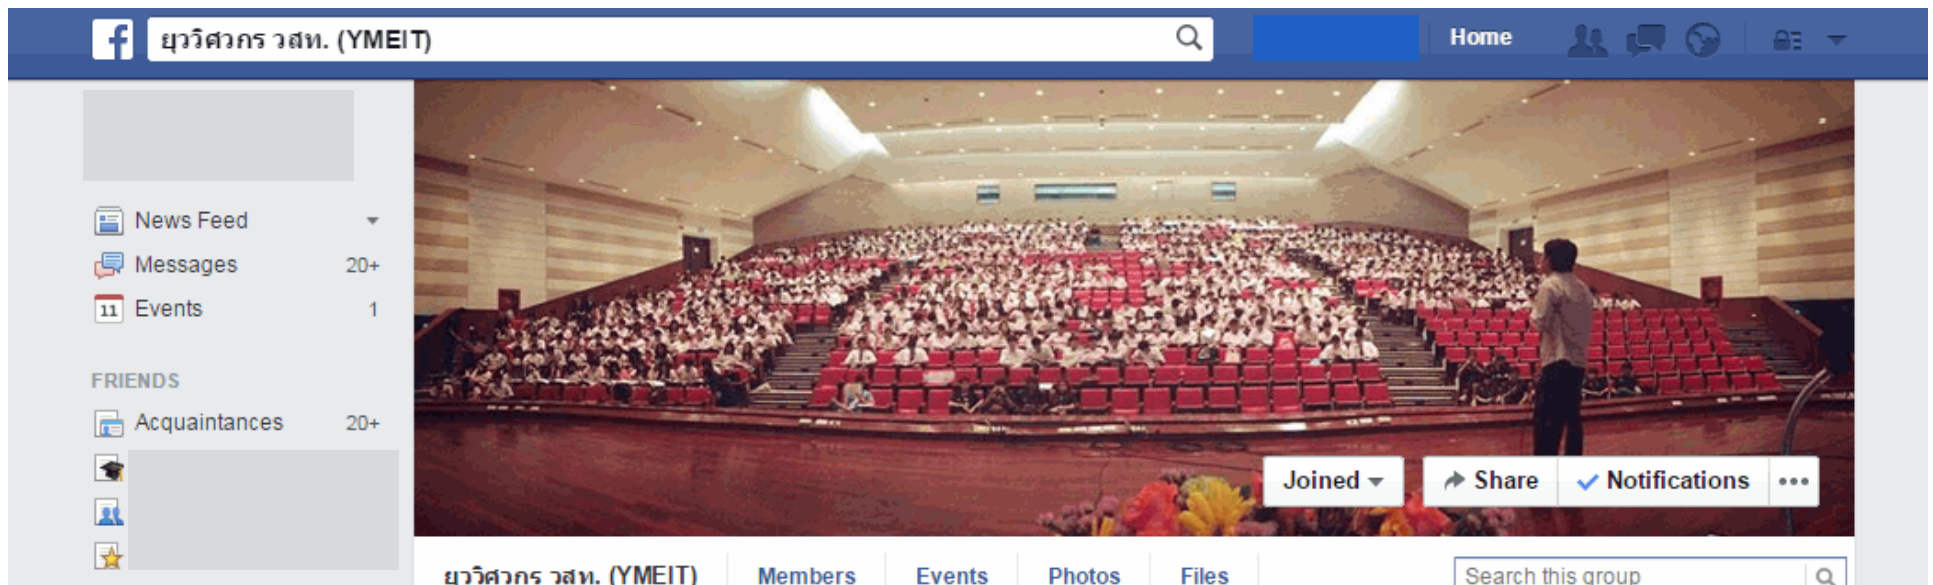

2) Engineering magazines

- Publish articles in Engineering Magazine monthly
- Published articles are:
 - Underground high voltages line for a beautiful city
 - Sharing information from 33rd CAFEO and YEAFEO issues
 - Eco-engineers : Waste management

3) Publishing news

- Create a network of engineers in social network for YMEIT with thousands young engineering members over the country to share information

4) Networking Camp

- To build the network of Young engineering student from Engineering University Network camp
- This camp we took place in the 100 yeas-old community in Bangkok, we aim the young realized that they will be our future to develop our home become more civilized
- 42 attendants come from 12 universities all over Thailand
- The activities are including :
 - History of Bangkok in Rattanakosin era
 - Technical site visit in the new underground flood way
 - Workshop with the traditional monk's bowl maker in the ancient community

4) Networking Camp
